Warranty & Safety Information

2 Hardware Installation

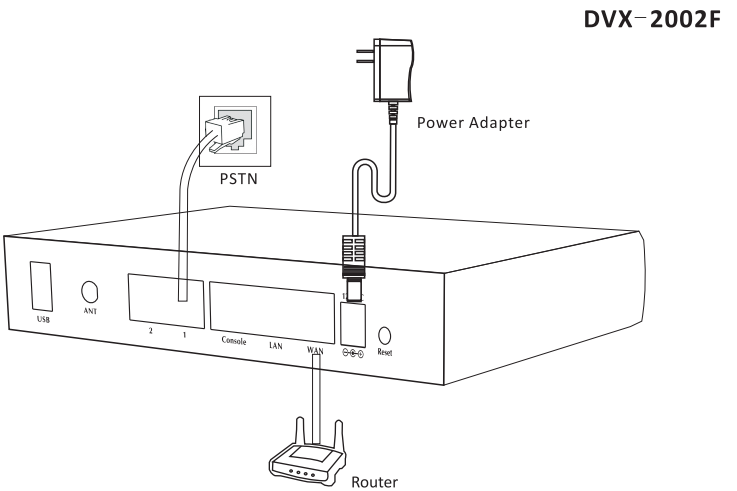
The followings are the instructions for setting up DVX-2002F IP PBX. Please refer to the illustration and follow the simple steps below to quickly install your IP phone.

2.1 Safety Precautions

Notes:
To avoid any device damage and bodily injury caused by improper use, please observe the following rules.

- Use only the power adapter provided with IP PBX.
- Make sure that the supply voltage matches the specifications indicated on the rear panel of IP PBX.
- To avoid the electric accident, do not open or remove the cover of IP PBX when it is working as well as off the power.
- Before cleaning the device, cut off the power supply. Do not clean it by the waterish cloth, and never use any other liquid cleaning method.

2.2 Physical Connection



2.3 LED Definitions

Indication	Function	Status	Explanation
PWR	Power Status	On	Power on
		Off	Power off

		Off	System failure
		On	System doesn’ t boot
WAN	WAN Data Status	Blink	Data transfer
		Off	Disconnected
		On	Connected but no data transfer
LAN	LAN Data Status	Blink	Data transfer
		Off	Disconnected
		ON	Connected but no data transfer

3 Basic System Configuration

3.1 Web Login

Step 1. Connect a computer and the DVX-2002F IPPBX in the same network. IP address is usually in the 192.168.1.X range.

Step 2. Start a web browser. To use the user interface, you need a PC with Internet Explorer (version 7.0 or higher), Firefox, Chrome.

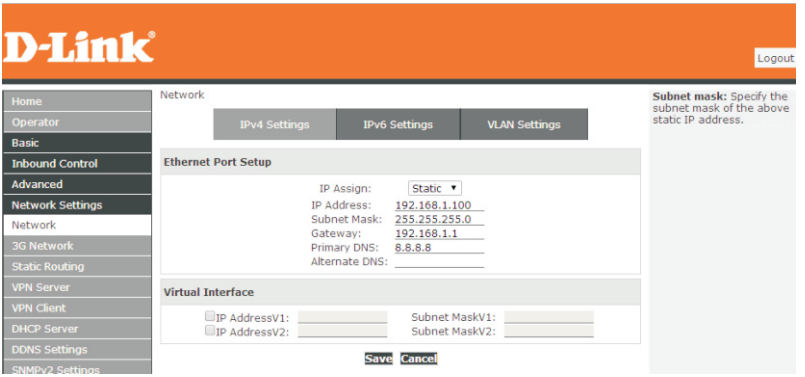
Step 3. Enter the default address “https ://192.168.1.100:9999” of the DVX-2002F IPPBX into the URL address box.

Step 4. Enter the default username (admin) and password (admin). Then click “Login” to enter the Web-based user interface.

Default URL address:
Default address of WAN port: https://192.168.1 .100:9999
Default address of LAN port: https://192.168.10.100:9999
Default Username: admin
Default Password: admin

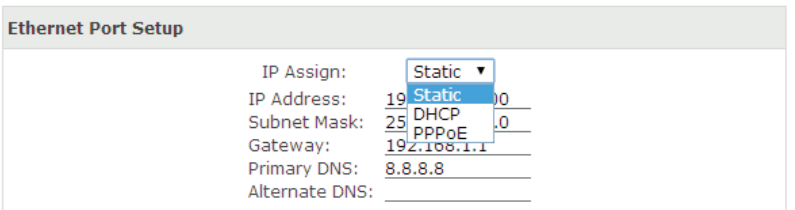
3.2 Network Configuration

Step 1. Go to Network Settings → Network



Step 2. Configure the network information

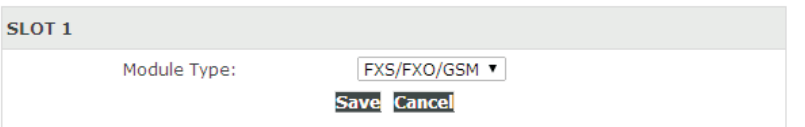
There are three types of network connection. They are Static, DHCP, PPPoE(Point-to-Point Protocol over Ethernet). You can find detailed settings in the user manual.



3.3 Choose the Module

Go to System → Module Settings

When using the module except DVX-2020 module, you need to set the module parameters with the below page.



Module Type: Select the module type of the device slot.

- DVX-2020 module — Default type. You don't need set anything for these modules.

4 Further configuration

Thank you for purchasing D-Link products. The above steps introduce simple configuration for DVX-2002F. For further configuration, please refer to the user manual.
