DES-105/DES-108

Quick Installation
Guide

DC Power Adapter

⚠ Note :
Using a power supply with a different voltage rating will damage and void the warranty of this product.

Notice Before Setting Up the DES-105/DES-108

The setup of the Switch can be performed using the following steps:

- A.** Install the DES-105/DES-108 in a fairly cool and dry place. See Technical Specification for the acceptable operation temperature and humidity ranges.
- B.** Install the Switch in a site free from strong electromagnetic source, vibration, dust, and direct sunlight.
- C.** Leave at least 10cm of space at the left and right hand side of the Switch for ventilation.
- D.** Visually inspect the DC power jack and make sure that it is fully secured to the power adapter.

⚠ Do not stack any device on top of the Switch.

DES-105

DES-108

Connecting the DES-105/DES-108 10/100 Mbps Fast Ethernet Switch to Your Network

A. Power:

Power is supplied through an external DC power adapter. Check the technical specification section for information about the DC power input voltage. Since the DES-105/DES-108 does not include a power button, plugging its power adapter into a power outlet will immediately power it on.

B. Fast Ethernet Ports:

These ports support network speeds of either 10 Mbps or 100 Mbps, and can operate in half- and full- duplex transfer modes. These ports also support automatic MDI/MDIX crossover detection, which gives the Switch true, “plug and play” capabilities. Just connect any network cable between the Switch and the device, and The Switch will automatically detect the settings of the device and adjust itself accordingly.

LED Indicators

A. Power Indicator

This green indicator light is on when the Switch is receiving power; otherwise, it is off.

B. Link/Act

This LED indicator light is green when the port is connected to a device. The green indicator blinks as data is transmitted or received.

TECHNICAL SUPPORT

You can find software updates and user documentation on the D-Link website.
